### **Product Updates**

#### **Introducing the Intruder Junior**

Our latest innovation, the Intruder Junior, is a compact and versatile pipeline inspection system designed for 2-4" pipes up to 140 feet. This modular unit allows for easy field repairs and customization, ensuring maximum uptime and efficiency. With its built-in 512Hz transmitter, you can quickly and accurately locate underground pipes. And now, you can play back and review your recordings directly on the unit's crystal-clear display, making it easier than ever to identify potential issues.

**STARTING AT \$5300**

### **Other Product Updates**

#### **New line of Self Leveling Cameras**

- We have released a new line of self-leveling cameras that make it easier than ever to get accurate inspections.
- Offering various financing options for our products, making it easier to get the equipment you need.
